Holiday season has arrived. At least that’s what all the trick or treaters signaled to me last night. Holiday season marks the end of our outdoor tennis season and the beginning of our indoor tennis season. The clays are in the process of being shut down. There may be a few days of play left but the water has been turned off and the lines will be taken up soon. Thank you to Shannon and his crew, they produced exceptional courts again this year.

Indoor season is going to be a busy one. We have a Fall Doubles Invitational coming up Saturday, November 10. Members are encouraged to invite guest players or teams to play in this all doubles event. Member teams are also welcomed to play. Last year was our first year for the event and it was a success. I look forward to seeing all the interesting matchups that occur this year.

Saturday, November 17, we will have a different type of competition happening at the Indoor Center. We will be hosting a USTA 10 and under event for local tennis players. This event helps introduce players to tournament competition. We have several future stars in our stable of players. It will be an exciting and entertaining day of tennis.

Hard to believe but it will not be long before it is time for the Holiday Mix, Mingle and Mimosas. Our annual holiday tennis mixer is set for Saturday, December 1. The fun begins at 10:00am and concludes sometime around noon. Come join us for a fun morning of tennis, unique competitions and of course, mimosas.

If you have been to the Club in the last few months you have noticed the reconstruction of the top two tennis courts. We are very pleased with the amazing surface we have been able to put down. The fences are a few weeks away from going up and the final seal will be on as soon as the weather allows. It is very exciting to see this project coming to life. The result will be a tremendous improvement in quality of play as well as the aesthetic improvements.

Look for details on upcoming events. If you would like to receive regular updates from the tennis center, please email us at cceptennis@ccofpaducah.com and asked to be added to the e-mail list.

See you at the courts,

Chris Dallas

Golf Course News

Shannon Watson, CGCS

Over the past few weeks, we have seen the temperatures swing from 90-degree highs to highs only reaching in the 50’s. Low temperatures dipped enough to let us see our first two frost and we also have received a descent amount of precipitation. The weather has been a mixed bag to say the least! I am hoping that rain events will continue, so the soil will enter winter dormancy with adequate moisture.

The management of the turfgrass on the golf course has entered our late fall protocol. The tees and collars have most likely received their last mowing of the year. Plant protectants have been sprayed on these areas to prevent any fungal activity on the warm season turf as it enters dormancy. The fairways are receiving their last mowing today and the same fungicide and nutrients were applied to them last week. The overseeding process in the rough is almost finished with two holes remaining and some additional seeding being completed a second time, to ensure thin areas will have ample turf cover next spring. The areas treated a second time will be in play areas, where the turf is thin due to tree competition. Overall, the process looks to be successful as ryegrass is germinating and growing above the bermudagrass. We will fertilize the new seedlings a few weeks after the process is complete. The bermudagrass range tee has been overseeded with a newer variety of bluegrass. The bluegrass/bermudagrass turf is referred to as Bluemuda. The idea of incorporating bluegrass into the tee came from work that athletic field managers are doing at the college and professional levels. They are overseeding their bermudagrass athletic fields with bluegrass to give year-round color, better playability, and increased protection for the bermudagrass during tough winters. Research shows the two turfs coexist well together and is a more sustainable alternative to overseeding with ryegrass. The results so far have been awesome and will serve as a test for possible future incorporation into our rough.

The greens are doing very well. The overseeding completed at the end of August was again successful. The poa contamination at this point is sparse. We have applied our fall growth regulation to combat this issue and we started the applications earlier this fall. The results have been exceptional! These applications create an environment that allows the bentgrass to grow over the stunted poa plants and make the greens pick up speed. We have reduced the mowing frequency of the greens to ensure that the ball roll does not get out of hand. So, if you haven’t played, your missing out!

We will soon be chasing leaves and mulching daily. November should be filled with this activity. We also intend to shore up some projects with additional dead tree removal, finishing the fairway expansions with sod, mulching of landscape beds, finishing planting the burning bush row on hole 14, raising irrigation heads around the greens, and pruning! I hope you all have a chance to come out and play, as Fall is probably the best time to enjoy the course!
